Northstar Retail 2025 Sales Performance Analysis

Data Analytics Portfolio Project

Tools: SQL | Microsoft Excel | Tableau

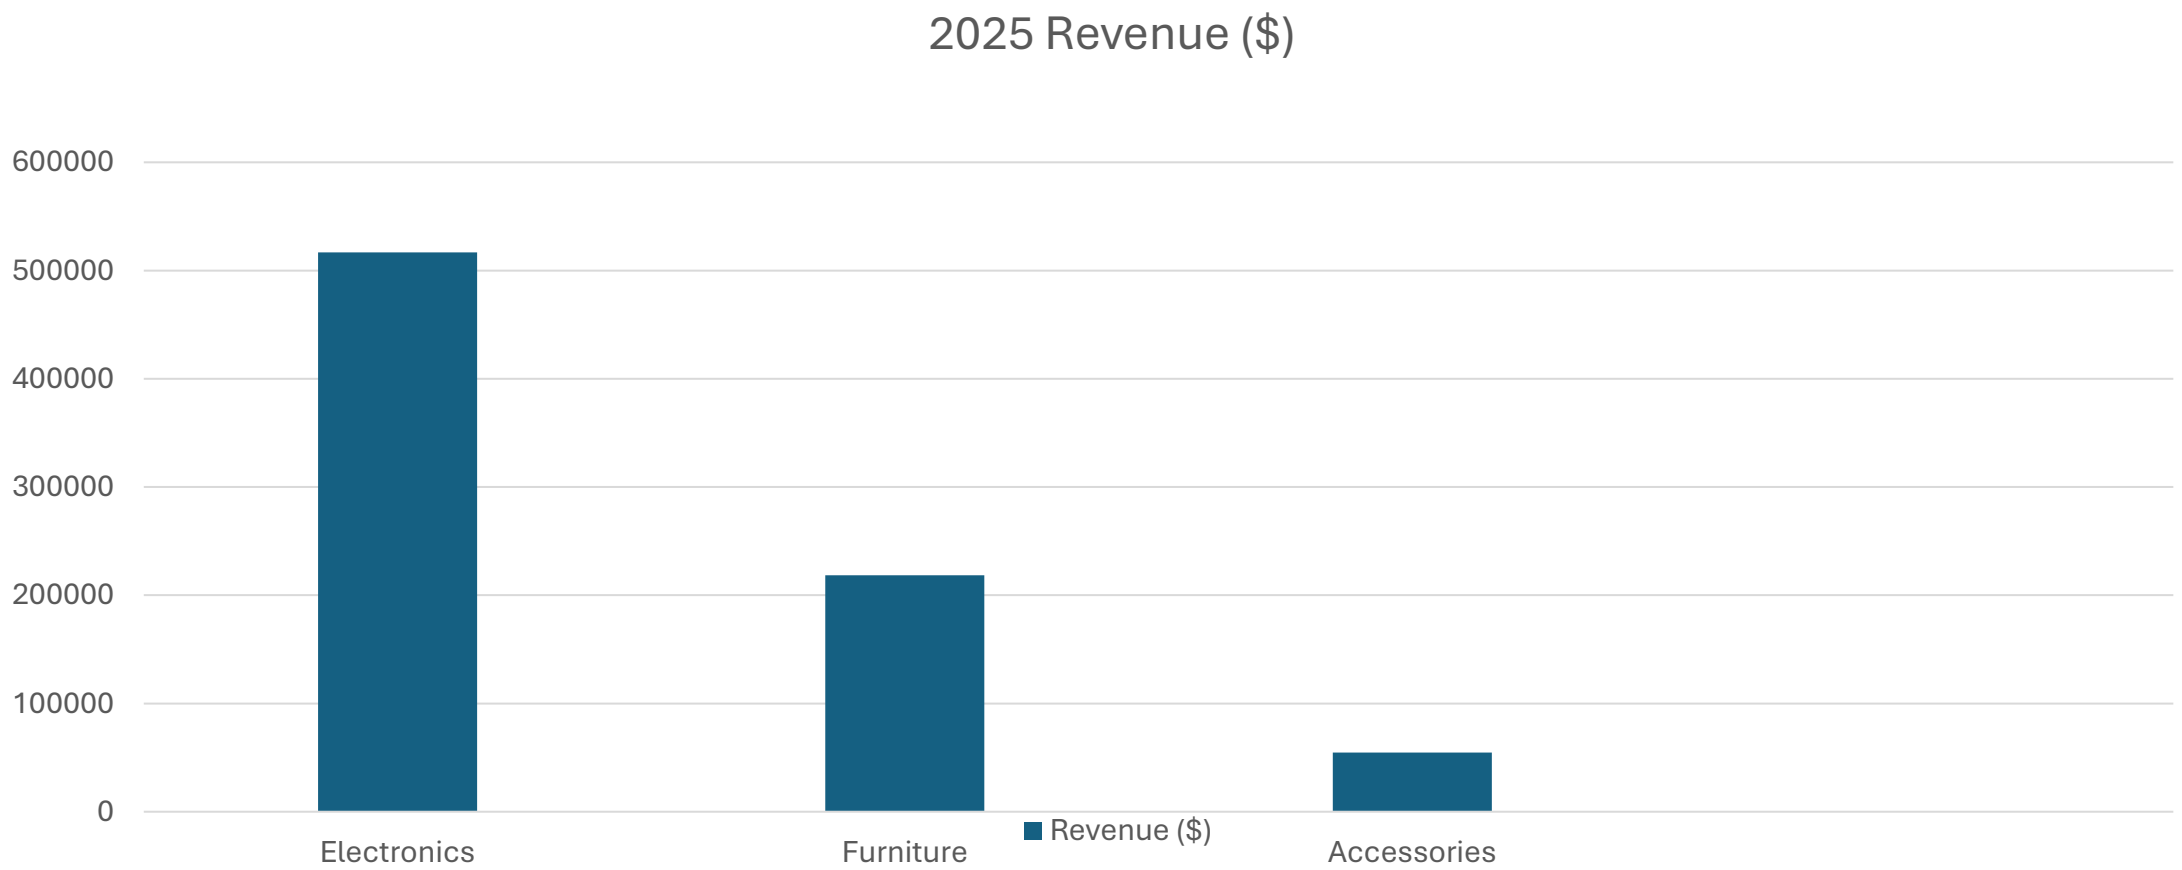

Role: Junior Data Analyst

Reporting Period: January–December 2025

2025 Executive Overview

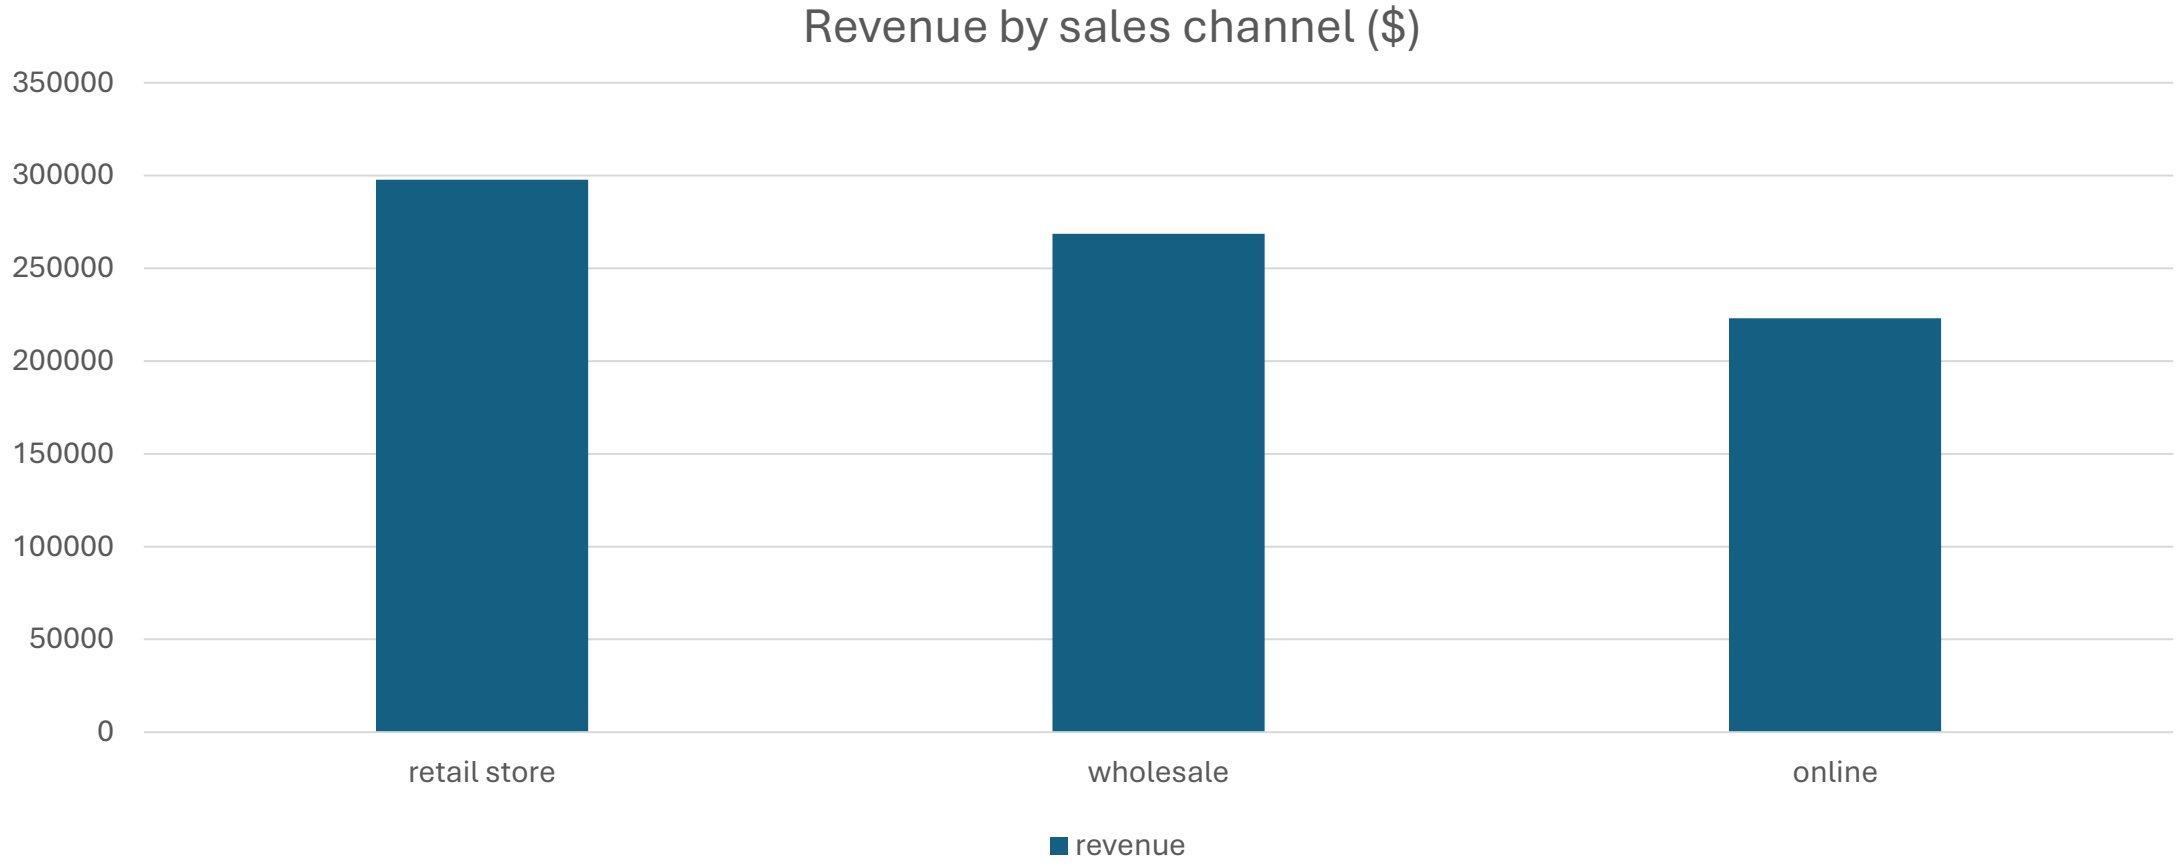

- TOTAL REVENUE
- **$789,828.52**
- TOTAL PROFIT
- **$183,652.15**
- TRANSACTIONS
- **1,000**
- PROFIT MARGIN
- **23.25%**
- Electronics was the leading revenue category, North was the highest-revenue region, and Retail Store was the top-performing sales channel by revenue.

Revenue by Product Category

Electronics generated approximately 65% of total revenue, making it Northstar Retail's largest revenue-producing category.

2025 Sales Performance by Channel

Key Business Insight

Retail Store generated the highest revenue ($297,750.71), while Online achieved the highest previously calculated profit margin (23.82%). Northstar Retail should maintain strong retail operations while exploring profitable online growth.

Data Quality & Validation Findings

- 1,000 transactions analyzed in SQL
- 999 unique order IDs — one repeated ID (NS-00405)
- 1 negative-revenue transaction (NS-00519, −$85)
- 2 missing region values
- 4 missing original profit values, addressed through calculated profit
- $420.67 revenue discrepancy between original Excel and restored SQL data, isolated to Accessories

Recommendation: Reconcile the Accessories transactions between source files and investigate flagged records before publishing final financial results.

Business Recommendations & Next Steps

- Protect Electronics performance: Maintain product availability and monitor demand in the company's largest revenue category.
- Expand profitable Online sales: Evaluate opportunities to grow Online sales while monitoring customer acquisition and fulfillment costs.
- Improve data quality: Investigate the duplicate order ID, negative revenue, and missing values.
- Reconcile financial reports: Resolve the $420.67 Accessories revenue discrepancy before publishing final results.

Conclusion: Northstar Retail can improve business decisions by combining sales performance analysis, profitability monitoring, and reliable data reporting.
